Professional Summary

Supply chain analyst with 2+ years of experience converting operational data into measurable business outcomes across procurement, inventory, and supplier management. Delivered **9% procurement cost reduction, 21% stockout reduction, 12.5% forecast accuracy improvement, and 10% OTIF improvement** through S&OP-driven planning, SAP-based operations, and structured cross-functional reporting.

Skills

- **Supply Chain Analytics:** KPI reporting, Dashboarding, Trend Analysis, Root Cause Analysis, Exception Reporting, Supplier and Inventory Performance Monitoring, Process Improvement, Stakeholder Reporting (weekly/monthly reviews)
- **Planning & Inventory:** Demand Forecasting, Reorder Point And Safety Stock Analysis, Supply Scheduling, fill-rate tracking
- **Tools:** SAP ERP, Excel (advanced formulas, pivots), Tableau, Power BI, Python (pandas), MySQL, Jira, SharePoint
- **Certifications**: Six Sigma Green Belt, Supply Chain Logistics, CSCMP Supply Chain Foundations: Demand Planning

Professional Experience

Data Analyst – Supply Chain, *DataStack Technologies LLC, Frisco, TX* May 2025 - Present

- Standardized supplier evaluation across 3 regions using landed cost, lead time, and defect rate scoring, replacing inconsistent buyer judgments and **cutting procurement costs 9%**
- Supported the monthly S&OP cycle by rebuilding demand planning with time-series forecasting and exception-based follow-up, improving **forecast accuracy 12.5%** while **reducing stockouts 8%**
- Built **Tableau dashboards** consolidating supplier spend, OTIF performance, and material variance, used by supply chain and operations managers in weekly reviews and presented in monthly leadership reporting
- Automated data extraction and cleaning from SAP and Excel sources using Python (pandas) and built Power Query templates for weekly KPI refresh, **reducing report preparation time from a full day to under two hours** each cycle
- Developed an exception report tracking delayed POs, Days of Supply coverage, and lead-time variance, giving planners 2 to 3 additional days to act before issues reached the production schedule

Data Analyst, *CrowdDoing, Frisco, TX* Jul 2024 – Apr 2025

- Built a Python (pandas) ETL pipeline to consolidate and clean 4,000+ records from multiple operational data sources, delivering structured, analysis-ready tables that enabled consistent biweekly KPI reporting
- Trained a Naive Bayes text classifier to auto-segment survey responses by theme, cutting **manual tagging time significantly** and enabling keyword-level trend analysis for team reporting cycles
- Published Power BI dashboards with live KPI feeds used in biweekly sprint planning sessions, **replacing stale static exports** and supporting Jira-based prioritization decisions with current data

Supply Chain Engineer, *Sree Laxmi Technocast, Coimbatore, India* Jun 2020 - Jun 2022

- Established SKU-level reorder points and safety stock parameters by analyzing Inventory Turns and fill rate data in SAP MM, **reducing stockouts 21%** and improving material availability for production
- Standardized shipment tracking across suppliers and 3PL partners with daily updates in SAP MM, **improving OTIF 10%** and giving production planners reliable visibility into incoming material timelines
- Conducted a probability-impact assessment across critical components, introduced safety stock buffers, and added a second-source supplier for three high-risk items, **cutting production delays 13%**
- Built supplier performance scorecards tracking delivery, quality, and pricing trends across key vendors, supporting renegotiations with 3 major suppliers and improving cost visibility across procurement decisions

Academic Projects

Continuous Improvement by implementing Lean & Six Sigma Methodologies, *Northeastern University* Jan 2024 – April 2024

- Led a Lean Six Sigma improvement project (course case study) using VSM, 5S, and error-proofing, delivering a future-state process design that modeled an 11% capacity increase and strengthened quality controls

Quality Data Analysis and Performance Monitoring, *Northeastern University* Jan 2024 – April 2024

- Developed data-driven quality monitoring systems using MySQL, Excel, and Power BI, creating statistical models for quality prediction that improved operational performance by 23% while ensuring accurate metrics tracking

Education

Master of Science in Engineering Management, *Northeastern University, Boston, MA* Sep 2022 - May 2024
Coursework: Supply Chain Engineering, Project Management, Operation Research, Lean Concepts GPA: **3.8**

Bachelor of Engineering in Mechanical Engineering, *PSG College of Technology, Coimbatore, India* Jun 2018 - May 2021
Coursework: Supply Chain Management, Manufacturing Process, Machine Drawing, DFMA GPA: **3.4**
